The screenshot shows an IDE window with a file named `classpath` in the `teste` directory. The file contains XML configuration for the Java classpath. The code is as follows:

```
1 <?xml version="1.0" encoding="UTF-8"?>
2 <classpath>
3   <classpathentry kind="con" path="org.eclipse.jdt.launching.JRE_CONTAINER/org.eclipse.jdt.internal.debug.ui.launcher.StandardJRE11" />
4   <attributes>
5     <attribute name="module" value="true"/>
6   </attributes>
7 </classpathentry>
8 <classpathentry kind="src" path="src"/>
9 <classpathentry kind="output" path="bin"/>
10 </classpath>
```

2-

The screenshot shows the same IDE window as before, but with a `Commit changes` dialog box open. The dialog box has the following content:

Commit changes

Commit message

Add Teste class with main method for sum calculation

Extended description

Added a simple Java class 'Teste' with a main method that calculates the sum of two integers.

Message and description suggested by Copilot.
